

NEWS LETTER JULY.

Item number One.

Attendance at meetings has fallen off very sharply for the past few meetings. (like only 3 or 4 people and one dog.) this might be due to the fact that everyone else doesn't know when the meetings are held. For their benefite here is a list of mettings for July and August . They are held at 9:00 PM.

July 19, August 2, August 16, August 30.

These dates could change without notice because of decisions made at the meetings. The best thing to do is come.

Item number Two.

On Tuesday the 19 there is some very important business to discuss. Tt is important that all club members attend. A vote will be taken. To find out more about this come to the meeting.

Item number Three.

The response to the 'summer plans' questionnaire was terrible. You should send them back even if you do not plan on attending anything. It helps to judge how many people are still interested in the club.

The trip to Holleford Crater was poorly attended. However those who went were greeted with a beautiful warm sunny day. Fun was had by all exploring the crater, posing for pictures, falling down drill holes, sinking in the swamp, etc.

The Summer Solstice Outing was also poorly attended. This enabled the participants to spend more time water-skiing, eating, and looking through telescopes, The only thing that marred this outing was the mosquitos. They were a bother, since they kept stealing the telescopes. The End.
